II. Situation

Electricity are still down, Communication collapsed due to power shortage causing data collection and reporting of the disaster's impact to be very slow. PKPU HI responded immediately to the incident by deploying the nearest available emergency respond team from Makasar of South Sulawesi. The 7 manned responder travelled immediately by land which took

them 18 hours after notification of the palu airport closure. The team is on the mission to respond to the need of evacuation of victims and initial assessment activities which would better map the condition in the affected areas. The team arrived on Saturday afternoon and quickly responded to the people's need of first aid. Due to the afterquake tremors still occurring the team quickly set up camp and assisted survivors with other urgent needs identified.
