source : BNPB

II. Gambaran Situasi

Telah terjadi gempa dengan kekuatan 7.7 SR pusat gempa 10 km pada 27 km Timur Laut Donggala, Sulawesi Tengah. K Tsunami sempat menerjang disebagian wilayah, dengan potensi

tinggi kisaran 0,5 - 3 meter di pantai Donggala. Komunikasi lumpuh akibat listrik padam menyebabkan pendataan dan pelaporan dampak gempa dan tsunami di Kota Palu dan Donggala tidak dapat dilakukan dengan cepat. PKPU HI merespon cepat kejadian ini dengan mengirimkan tim respon dan assessment sebanyak 7 orang dari Makassar melalui jalur darat, tim tiba di Donggala pada Sabtu sore hari. Bersama kementerian sosial, BNPB, tim PKPU HI ikut terjun langsung untuk membantu evakuasi parakorban. Berbagai kemungkinan kolaborasi dengan pemerintah baik TNI, BNPB, PT. Pelni dijajaki untuk mempersiapkan kemungkinan kemudahan akses untuk menjangkau wilayah terdampak gempa.

source: BNPB (National Disaster Management Agency)

## II. Situation Overview

An earthquake has occurred with a strength of 7.7 SR epicenter 10 km on 27 km East of the Donggala Sea, Central Sulawesi. The Tsunami struck at some areas, with a high potential range of 0.5 - 3 meters on Donggala beach. Communication crippled due to power outages caused data collection and reporting of the impact of the earthquake and tsunami in the City of Palu and Donggala could not be carried out quickly. PKPU HI responded quickly to this incident by sending a response and assessment team of 7 people from Makassar by land, the team arrived in Donggala on Saturday afternoon. Together with the Ministry of Social Affairs, BNPB, PKPU HI team went directly to help evacuate the victims. Various possible collaborations with the government, including the Indonesian National Army, National Disaster Management Agency, PT. Pelni was explored to prepare for the possibility of easy access to reach earthquake affected areas.
